

# Spider Crafts!

## EGG CARTON SPIDER

Cut the spider legs pattern from black construction paper. Fold the legs along the dotted lines. Cut a section from an egg carton and paint it a desired color. When dry, glue the egg carton section to the top of the spider leg pattern. Make a large spider web on the class bulletin board using white yarn. Let students pin their own spiders to the class web to create a spooky display.

## SPIDER WEB "SNOWFLAKE"

Fold a square piece of white paper in half and then again in thirds. Square off each section, as shown, so that you now have a hexagon shape. Cut away sections, alternating from side to side. Carefully open the web. Children can display their "egg carton spiders" along with their spider web "snowflakes."
