

## Scarecrow Relay

**What is needed:** Start line, Finish line, kids

### How to play:

1. Create a start line and an obstacle 20 or more feet away and then divide the guests up into teams. You can have 2, 3 or more teams.
2. Now instruct the participants that they must start at the starting line and then go around the obstacle (Pumpkins work great) and return to the start line and tag the next player so they can do the same thing.
3. Continue this until all players have gone. The first team to complete the task wins!
4. **Sounds simple, right?** Now tell them that they can't bend their knees while doing this and must walk like a scarecrow; Arms up and in more of a side to side motion. It could be a stiff scarecrow like one that is standing in a field, or a swaggering scarecrow like the one from Wizard of Oz.
5. If you catch them bending their knees they have to return to the start line and go again.
6. **Want to make it more difficult?** Add a tray and a cup of water and if they spill the water they must return to start line and start over.
