Grass Heads

Component: STEM

Time: 30 minutes

Materials:

Old tights/ stockings
compost
Grass seeds
Rubber band
googly eyes
plastic cups/or small potting cup
Felt
water

Procedures:

1. Put 2-3 generous table spoons full of grass seeds at the bottom of the tights.
2. Then add a lot of compost until you have a nice sized ball. Tie the bottom of the tights. Shape into a ball if necessary.
3. Pinch a "nose", twist it and wrap and tie in place with a rubberband.
4. Glue on googly eyes and mouth.
5. Place in a small potting cup or plastic cup. Add water and the tights will "soak the water up" into the compost. If you want to speed it up, you can give the head a quick shower under the tap to moisten the earth the first time round. After that take care not make it too wet. Place in a sunny spot. The grass hair will keep growing and kids can cut/trim the hair.
